WEEK 07

GRABBER 2.0

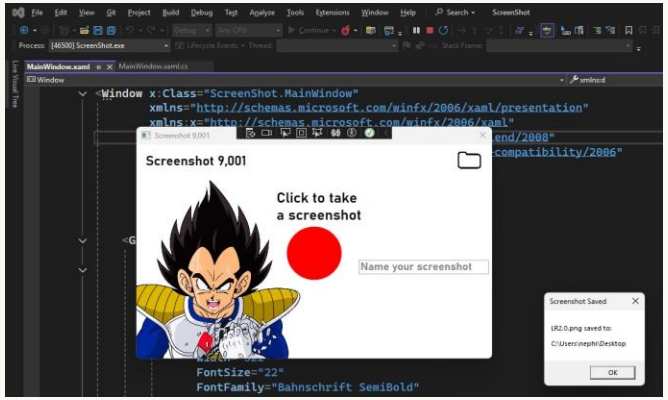

Contributors: Kevin, Luisa, Pascual, Roman, Vinh

REFACTOR THE CAPTURE FLOW

- Move repeated capture work into focused methods. Hide or minimize the Grabber during capture, restore it, and show a clear success message in lblMessage.
- Context: Support and Training Grabber. Use clear interface language such as “Capture Screen” and “Screenshot saved,” or equally clear labels.

Tested Build

DOCUMENT AND PACKAGE THE PROJECT

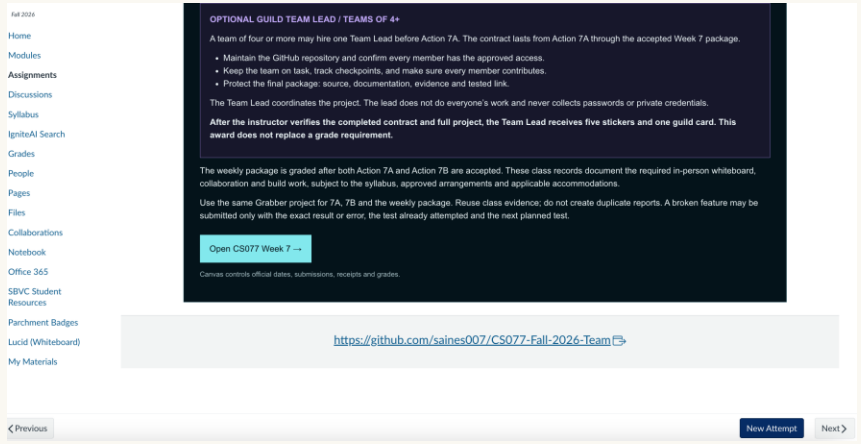

Explain the app's purpose, controls, method flow, tests, limitation and next step.

- The app's purpose is to help the user capture a screenshot and save it on their device.
- The controls and logical map can be read at README.MD
- The limitations of the app are subjective to the user and can be improved upon by user, team, and community feedback. The next step would be improving functionality based on this feedback.

CS077 / WEEK 7

Grabber 2.0 Route Receipt

Status	Route selected
Context	Support and Training Grabber
Team mode	Guild team with contracted Team Lead
Receipt ID	CS077-W7-TECHNICAL-1EE806CC
Requirements	2026-10-05.1

Requirements

R1 / 7A / Refactor the capture flow
Move repeated capture work into focused methods. Hide or minimize the Grabber during capture, restore it, and show a clear success message in lblMessage.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

R2 / 7A / Submit the Action 7A record
Include the 7A whiteboard before/after trace, peer call-order check, concise Discord record, running screenshots and accepted Git checkpoint.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

R3 / 7B / Add Save and Clear
Let the user choose a PNG location, handle cancel without crashing, clear the preview and status, and keep the app ready for another capture.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

R4 / 7B / Submit the Action 7B record
Include the save/cancel/clear whiteboard trace, peer test, concise Discord record, saved-file and reset screenshots, AI record and accepted Git checkpoint.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

R5 / WEEK / Document and package the project
Add a readable README, organized evidence, a tested Release build and the class-approved ZIP package. Explain the app's purpose, controls, method flow, tests, limitation and next step.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

R6 / WEEK / Submit the tested GitHub link
Add the Week 7 receipt to the repository, commit and push the final package, test instructor access, then submit the GitHub repository URL through Canvas.
Context: Support and Training Grabber. Use clear interface language such as "Capture Screen" and "Screenshot saved," or equally clear labels.

This receipt records the selected context, team mode and current requirements. It does not establish completion, attendance, submission or a grade. Include it in the GitHub repository and submit the tested repository URL through Canvas.
